

Drag/Propel Transfer Switches

Transfer switches for your dragline can be expensive and difficult to maintain. Flanders Electric has the transfer switch solution that you been looking for. These custom re-manufactured locomotive switches are economical, tough and time tested over years of service on draglines just like yours.

- Electric over air operated for simplicity
- Rugged design proven over years of service in the mining industry
- High Reliability
- Low Maintenance
- Simple operation and troubleshooting
- Retrofits easily into your existing enclosures using existing wiring
- They usually can be installed in just one down day
- *COST EFFECTIVE!* One customer bought this switch for **less** than he paid for one set of renewal contacts from Brand X!

Call or write to find out more about our Drag/Propel Transfer Switch. We welcome the opportunity to talk with you about how Flanders Electric can become your valued partner for electrical control solutions.
