

# TEWAC and TEAAC Motor Upgrades

With more than 50 years in operation, Flanders Electric is a nationally leading electric motor repair and motor manufacturing company that offers the most complete line of technical services anywhere.

As a part of our technical capabilities we offer a complete line of engineering and manufacturing services for electric rotating machinery users. Flanders Electric designs and manufactures Totally Enclosed Air-to-Air Cooled TEAACs (patent pending design) and Water-to-Air cooled TEWACs for industrial users.

An FE upgrade in motor ventilation eliminates influences from harsh environments and provides increased cooling capacity to allow for operation at and above the nameplate rating.
